SKILLS SUMMARY

- **Languages**: C, C++, Python, Java
- **Frameworks**: JavaScript, HTML and CSS
- **AI/ML**: Stable Diffusion, Pandas, Scikit-learn, Gradio
- **Tools/Platforms**: Git, GitHub, Data Structures, MySQL
- **Soft Skills**: Teamwork, Problem-Solving, Project Management, Adaptability

PROJECTS

REEL - Cinema Discovery App | GITHUB Feb 2026 – Present

- Built a full-stack cinema discovery web app using React, Vite, and Express.js that delivers mood-based and genre-filtered movie recommendations powered by the TMDB API.
- Implemented granular filtering by mood, genre, era, and advanced preferences (hidden gems, foreign films, auteur cinema) along with a "Surprise Me" random recommendation feature.
- Integrated streaming platform availability (US), dark/light mode toggle, and rich movie details including director, TMDB ratings, and a custom vibe score, enhancing the overall user experience.

Stable Diffusion Image Generator | GITHUB Sep 2025– Oct 2025

- Designed and implemented a generative AI solution leveraging diffusion models to automate high quality image synthesis for diverse input prompts.
- Developed workflows for image generation, prompt engineering, and model fine tuning using advanced Python libraries and GPU acceleration.
- Delivered a robust platform that reduced manual image creation time and enabled scalable, user driven visual content production.

Email Spam Detector | GITHUB Jul 2025 – Aug 2025

- Implemented an SVM classifier with TF-IDF feature extraction to accurately identify malicious spam emails, enhancing email security through precise classification.
- Applied advanced sneaky word pattern detection and linguistic analysis to capture excess spam content.
- Utilized emotional tone and urgency based sentiment filtering to detect high risk, urgent spam messages, improving threat detection accuracy and response.

TRAINING

Cybersecurity Essentials - LPU | Certificate Jun 2024

- Built a Brute Force Attack Simulator with Detection as the final project, implementing login-attempt monitoring and alert mechanisms.
- Practiced detection techniques using IDS/IPS concepts, log analysis, and basic incident response workflows.
- Gained hands-on experience with system hardening, secure configuration, firewalls, and vulnerability assessment tools.

ACHIEVEMENT

- Solved 100+ DSA problems across platforms like LeetCode, strengthening problem-solving and algorithmic thinking skills | LPU Jun 2024

EDUCATION

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering Since Aug 2023
  CGPA: 7.20
- **Sri Chaitanya college** Tirupati, Andhra Pradesh
  Intermediate - MPC Apr 2021 – Mar 2023
  Percentage: 95%
